

You can use the CAS Solution Memory feature to store, recall, and delete the history of CAS/ALGEBRA calculations of the ALGEBRA FX 2.0/GRAPH-100.

Select the MEM menu to go to the CAS Solution Memory display.

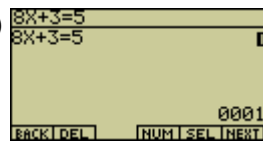

The CAS Solution Memory display is equipped with the following features.

Storing the history of calculations

Select the SAVE menu to store the history of calculations in the CAS Solution Memory.

Recalling the history of calculations

Select the DISP menu to recall the first (the oldest) history of calculations with the number 1.

Deleting the history of calculations

Select the DEL menu to delete the history of calculations in the CAS Solution Memory while it is displayed.

When you want to optimize the Memory, select the OPT menu in the CAS Solution Memory.

To delete the entire data in the CAS Solution Memory, select the DEL - A menu on the CAS Solution Memory screen.
